ΟΛΥΜΠΙΑ ΔΩΜΑΤΑ

OR AN

ALMANACK

for the Year of our

LORD GOD

1697.

Being the 1st after Biſſextile or Leap-year, and from the Worlds Creation, 5646.

Wherein is contained the Lunations, Conjunctions and Aſpects of the Planets, the increaſe, decreaſe and length of the day and night, with the riſing, ſouthing and ſetting of the Planets, and Fixed Stars throughout the Year, whereby may be known the exact hour of the night at all times, when either the Moon or Stars are ſeen.

Calculated according to Art and referred to the Horizon of the ancient and renowned Borrough-Town of *Stamford*, whoſe Longitude is 24 degrees, Latitude 52 deg. 41 minutes, fitting all the middle Counties of ENGLAND, and without ſenſible errour the whole Kingdom.

By *JOHN WING* Mathemat.

CAMBRIDGE,

Printed by *John Hayes*, Printer to the Univerſity, 1697.

Common Notes for this present Year, according to the

Julian, English or old account.		*Gregorian* or new account.

The Terms and their returns this Year.

Hillary Term begins January 23. and ends February 12, and hath 4 returns, viz.

- Octab. Hilar. January 21
- Quind. Hilar. January 28
- Craft. Purif. February 4
- Octab. Purif. February 9

Easter Term begins April 21, and ends May 17, and hath 5 returns.

- Quind. Pasch. April 23
- Tres Pasch. May 1
- Mens. Pasch. May 8
- Quinq; Pasch May 17
- Craft Ascen. May 21

Trinity Term begins June 4, and ends June 23, and hath 4 returns.

- Craft. Trin. May 31
- Octab Trin June 7
- Quind. Trin. June 14
- Tres. Trin. June 21

Michaelmas Term begins October 23, and ends November 27, and hath 6 returns.

- Tres. Mich. October 21
- Mens Mich. October 28
- Craft Anim November 3
- Craft. Mart. November 12
- Octab. Mart. November 18
- Quind. Mart. November 26

Here stands the Terms, with their Returns,
The Lawyers laugh, their Clients mourns.

The Glorious Planet *Venus* is our Evening Star to the 12 day of *June*, from thence to the end of the Year, she shines in the Morning.

THis Table ſhews the Intereſt of any ſum of Money from 1 *s.* to 100*l.* from a day to a year. And by the help of Addition you may compute the Intereſt of any ſum whatſoever. And note, that for the greater exactneſs the peny is divided into a 100 parts; ſo that 25 parts are a farthing, and 50 parts an half-peny, and 75 parts 3 farthings, *&c.*

Example:

The Intereſt of 100 *l.* for ſix months one Week and one day, is thus found by the Table.

		l.	*s.*	*d.*	*q.*		
Intereſt of 100 *l.*	for 6 mon.	03	0	0	00	*l.*	*s.* *d.*
	for 1 week,	00	2	3	61	viz.	3-2-7 half-peny
	for a day,	00	0	3	94		
		03	2	7	55		

A Regal Table in a more exact manner.

The Year, Month, and Day, (accounting the Year to begin Jan. 1.) wherein every King and Queen of Eng. since the Conquest began their reign.			The number of Years, Months, and Days, that every K. and Q. reigned to reign p 28 da. to a month.						The num. of Y. expired in this Y. since they began as also since they ended.

Here Gods Vicegerents do in order ſtand
And how ſucceſſively each Rul'd the Land;
May we not want a Monarch great indeed
Wiſe, good, and gratious, mercifull in need:
For ſuch a one may all good Chriſtians ſtand
Both now and always for to Rule this Land.

A PROGNOSTICATION,

for the Year of our

LORD GOD

1697.

Being the 1st after Biſſextile or Leap-year.

Wherein is contained the time of the Sun's Ingreſs into the Four Cardinal Signs, from our New Tables, with a Figure of the Heavens from the ſame Tables, at the time of the Sun's Ingreſs into *Aries*, from which the ſtate of the Year is predicted. A Table ſhewing the hour of the day by a Rod, or hand ſtick. alſo a pleaſant Chronology of memorable things ſince the Creation of the World.

A ſhort diſcourſe of the Feaſts and Faſts of Chriſtians, wherein is ſhewed the Antiquity, and end of their Inſtitution.

Uſeful and pleaſant for all thoſe which are deſirous of ſuch a work.

By *John Wing*, Math.

CAMBRIDGE,
Printed by *John Hayes*, Printer to the Univerſity, 1697.

A Table shewing the true Hour of the Day by a plain Staff divided into 10 equal parts.

1697.

☞ Note that q stands for *Quadrans* a quarter of a part; ſ for *semiſs* half; and d for *Dodrans* three quarters of a part.

To find the true Hour of the Day by the former Table.

TAke a Staff of what length you pleaſe, and with a pair of Compaſſes divide it into ten equal parts marking them upon the Staff; then in ſome level place where the Sun doth ſhine, ſet it upright, and mark where the end of the ſhadow falls; which done, meaſure with your Staff the length of the ſhadow, and note the parts it contains, which find out in this Table right againſt the day of the month, and over head you will find the true hour of the day; as will appear more clearly by example.

Suppoſe the 9 of *April* or 13 of *Auguſt* I ſhould find the ſhadow of the Staff to be 30 parts and a quarter of a part more, that is, three Staffs length, and a quarter of a part, therefore ſeeking in the Table, againſt the ſaid days, I find 30 *q* which is 30 parts and a quarter; and I ſee over head that it is then either 7 a clock in the morning, or 5 in the afternoon; ſo that if your obſervation was in the morning, it was 7; but if in the afternoon, 5 a clock.

Thus the 13 of *February*, or 8 of *October*, if the ſhadow of the Staff be juſt 19 parts, it is 12 a clock, if 20 it's one a clock, if 24 two a clock, if the obſervation be made in the afternoon.

Thus you ſee the hour of the Day is exactly and ſpeedily found, by a Rod or Staff and the help of this Table; ſo likewiſe by the Kallender part may the hour of the Night be known either by the Moon, Planets, or Fixed Stars, being of excellent uſe to all ſorts of Men.

A Compendious Chronology of Memorable things since the Creation to this Year 1697.

From the Creation of the World, *Juxta*

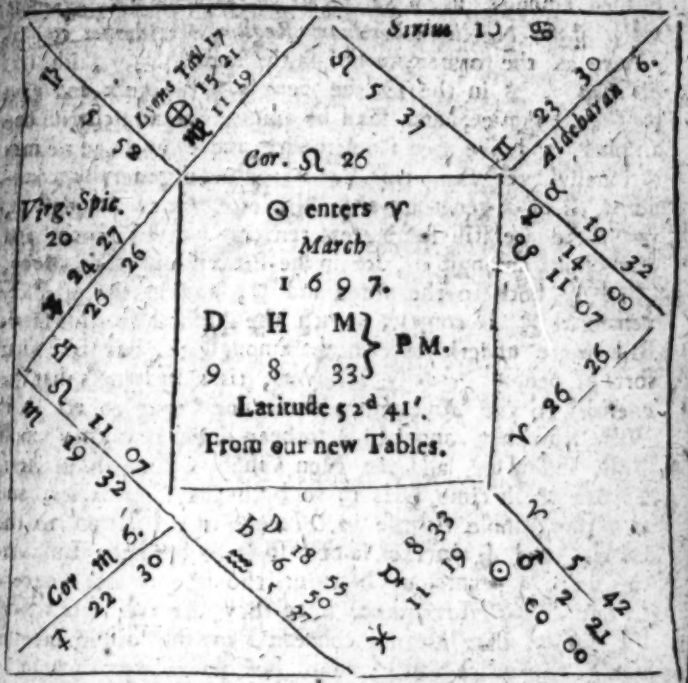
Welcome good Reader unto Ninety Seaven
Where things appear indifferently even
Time tells us how all Revolutions paſs
And who therein the chief agreſſer was
Some covet peace, and ſome for Plotting are,
Some are for eaſe, and ſome inteſtine War:
Others for gaming, Luxury and pride,
And ſome their difference never can decide;
But how much better were it with conſent
To do theſe things we never need repent.
Conſider this before your Bodies fall,
The time is paſſing which you can't recall.

Of the Spring Quarter.

THE Vernal, or Spring Quarter derives its name, *à virendo quia tunc omnia virent & florent*, becauſe all Vegetables at that time become green and flouriſh.

This Spring Quarter Aſtronomically begins at that inſtant that the Sun touches the firſt ſcruple of *Aries*, which happens this preſent year in the Meridian of *Stamford*, on Tueſday the 9 Day of *March* at 8 hours, 33 minutes in the afternoon, for which time the following Figure is erected, in which ♃ claims a propriety in being Lord of the year, as ſurmounting all the other Planets in dignities, and ♄ next,



next, and ♀ not to be omitted as a partner in the government in this Spring Quarter. It is the opinion of the famous *Haly* that when ♃ is Lord of the Year, and in no Aspect of the Sun or other Planet (as here) that the Year shall be temperate and wholesome, he also affirms, *Lib.* 8. *Cap.* 4. *Quod Jovis temperie æstatis calor, & frigus hyemis temperantur, quod minuantur Epidemicæ infirmitates ac pestis.* The reason of it easily appears, which is caused by the gentle breathing of the North Winds, which ♃ moveth: to which we may add, that it signifies that all sorts of persons in Religious Orders shall be happy, successful and well, and the propagation of Religion more firmly esta-

 blished

bliſhed amongſt us, *Si fuerit ☿ infortunatus ſignificat malos ſtatus Nobilium hominum Regum Alcaydorum & Judicum*, as the former Author ſaith, and *Ramſey* ſaith, *lib. 4. chap. 7.* ☿ in the 12, the people ſhall profit and gain by their enemies, and ſhall be quiet, love and cheriſh one another, and live free from malice and envy, and we may rationally aver that this Vernal Scheme generally conſidered, is of a generous and Noble tendency amongſt us, yet there are ſtill ſome few remains of difference and diſcenſions amongſt us, for in the Preventional Full Moon, ☌ is ☌ both to the Moon and ☿, and in the ☌ Poſt-ventional ☌ is conjoyn'd with the Moon alſo, this ſhews ſtill more underhand dealings amongſt us, but by what ſort of people ☿ daily diſcovers, tis a happineſs that the enemies to the Government have not power to act their Wills, thô they cannot yet forbear doing that they muſt Juſtly ſuffer for, and the Non Viſible Eclipſe in ♏ *April* 25, at which time ♄ is □ to both the Luminaries, and alſo the Viſible Eclipſe in *October*, in oppoſition to the former, and ♄ in the ſame Aſpect to both the Luminaries is of a pernicious Nature, thô it doth not concern us but to our Advantage, ſince they are celebrated from thoſe Signs that are not concern'd in the diſturbance of our *Engliſh* peace and Honour, but before we conclude we are to conſider, that the Sign Aſcending in this Vernal Scheme is moveable and therefore we ought not to put the whole Streſs and Tranſactions of the Year, upon this Vernal Figure, yet all that I ſhall obſerve more, as material in this preſent years Revolution is the oppoſition of the two infortunes ♄ and ♂, which happens *Auguſt* the 27 day from ♌ and ♒, which in the firſt place betokens a Sickly Autumn, and is an Aſpect of a moſt miſchievous tendency in earneſt, it premonſtrates great trouble if not Death to ſome great and famous Prince. God preſerve the Fruits of the Earth from the violence of Lightnings and Tempeſtuous Storms, and that we have not a ſcarcity amongſt us, which this ſecondary cauſe ſeems ſtrongly to import, and if I miſtake not, the former poſition foretells

us

us of some Notable Action both by Sea and Land, aboue the latter end of *Auguſt* or the beginning of *September*, to conclude the years diverſion with. Thus much with what is intimated in the Kalender part is chiefly portended from Aſtral cauſes, thô of which there is no real Demonſtration to be made or expected, ſince (as I have formerly ſaid) the Stars are but Secondary cauſes, and God only who made them can alter the courſe of Nature when he pleaſeth, thô we have ſeen lately in a Wonderfull manner the Starry Influences verified, therefore to conclude,

The Starry Science let who will oppoſe
Hath wiſemen to its friends, fools to its foes
True men of worth this Art did never Smut ch,
But always were incouraged by ſuch.
Tir neither Zoil *nor* Momus *can betray*
Nor ever cauſe an Artiſt from't to ſtray.

Of the Summer Quarter.

THE Summer Quarter is always ſaid to begin when this our Earthly Globe inclining Southward 23 degrees 29 min. 15 ſec. towards the Sun, will Volve and remove us her Northern Inhabitants to the greateſt portion of day, or when the Sun (according to appearance) enters into the firſt minute of ♋, which either way taken falleth this year upon Thurſday the 10 of *June* 6 minutes paſt 9 at night.

Of the Autumn Quarter.

THE Autumn or Harveſt Quarter beginneth at ſuch time as the Sun toucheth the firſt ſcruple of the Equinoctial ſign ♎, or more really when the Earth enters ♈, hath volved her ſelf at right Angles to the Sun, and receiveth a like portion of light and darkneſs, which either way taken, happens this Year on Sunday the 12 day of *September* at 14 min. paſt 10 in the morning.

Of

Of the Winter Quarter.

THE laſt Quarter called Winter makes its entrance at ſuch time as our Earthly Globe by its Circumrotation hath volved it ſelf to the greateſt Northern inclination, whereby we, being furtheſt deflected from the Sun Raies, receive leaſt light, and cauſes our ſhorteſt day and longeſt night, or (according to appearance) when the Sun enters ♑, which either way taken, falls this year upon Friday the 10 day of *December*, at 17 minutes after midnight, or Saturday the 11 at 43 min. before 1 in the morning.

Of the Eclipſes this Year 1697.

THere happens this Year to the Inhabitants of this Terreſtrial Globe the Earth three Eclipſes, *viz.* one of the Sun, and two of the Moon, in the following order.

The firſt Eclipſe is of the greater Lumina ie the Sun, which happens the 11 of *April* near 1 in the morning, therefore not to be ſeen by us, but may be beheld by our Antipodes, *&c.*

The ſecond Eclipſe is of the Moon, not to be ſeen here in *England*, it happens in *May* the 26 day near 8 in the morning, and may be ſeen in *Japonia*, *Luconia*, the *Molucca* and *Philippine* Iſlands, it may likewiſe be ſeen in *California*, *Virginia*, *New Spain*, *Mexico*, &c.

The laſt Eclipſe is of the Moon on the 29 day of *October* about 8 at night, and may be ſeen here in *England*, if Clouds hinder not, which according to our New Tables, happens as the following Calculation directs, both in time and quantity.

The Calculation.	D. S.	H. D	′	″
True ☽ according to the middle time	08. 19	7	51	49
The true place of the Sun	♏	7	06	17

Excess

Excentrick place of the Moon	♉	7	05	17
North Node substract	6	29	15	57
Argument of the Moons Latit.	6	7	50	20
True Latitude of the Moon So. Decend.			49	49
Time of Reduction Add			3	01
True ☌ respecting the Ecliptick *Octob.*	19	7	54	50
Equation of time Add			9	25
Apparent time of the true ☌ *Octob.*	19	8	4	16
Scruples deficient			20	43
Digits Eclipsed 7 deg. 29′ 10″		7	29	10
Scruples of Incidence			47	08
Time of Incidence		1	22	00
Interval Add			3	27
Middle or greatest Obscuration *Oct.*	19	8	7	43
Total duration		2	44	00

Hence	H.	′	″	
Beginning of the Eclipse	6	45	43	P. M.
Middle of the Eclipse	8	7	4	
End or full recovery of Light	9	29	43	
Latitude ☽ at the beginning	36′	20″		So. Decend.
Latitude ☽ at the end	45	10		

But to satisfie the vulgar how this Eclipse will appear at the middle or greatest Obscuration, *viz.* how much of it will be dark, and how much light, observe then that it will appear according to the aforegoing Calculation near two third parts of the Moons body to be darkned on the North (or upper) side, and something above one third part on her South side or bottom will be light.

A Brief discourse of the Feasts and Fasts both Moveable and Fixed.

ALL the Feasts and Fasts in the Year are set apart to be religiously and piously observed, since they are ordained and kept in Commemoration of the Blessed Prophets and Apostles, amongst which the Lords Day is to be

be observed in a more strict and special manner, w[hich] day the Apostles have ordained and appointed in the p[lace] of the Jewish Sabbath. Let not Christians therefore [be] to be bound and tyed to *Judaism*, and the Ceremonie[s] the *Jews*, and their Superstitions, but rather by the ab[o]gation of the Ceremonial part of the Mosaical Feasts, [to] them testifie their Christian liberty. So in the Coun[cil] held at *Laodicea*, which was celebrated about the Yea[r] our Lord 36[0]. *Can.* 29. it was ordained, and forbi[d]den, that Christians should commit Judaism, and b[e] idle on the Sabbath day, but rather to follow their o[r]dinary callings and imployments, preferring Sunday [to] their Sabbath, because on that day, Christ was born, [rose] from the dead, and sent the Holy Ghost upon the Apostles.

And for the other Feasts (besides the Lords day) [which] they are not to be neglected, so are they neither to be a[b]used, by doing evil and mischief thereon, but resting from our ordinary labour, we should all of us, from the high[e]st to the lowest do that which is good, and may tend to the glory of God, and our own salvation. But to proceed.

Septuagesima is (as it were) so called of 70, which the Church doth observe in remembrance of the 70 days that the Israelites were under the *Babylonish* servitude.

Sexagesima was another week added by the Ancients to the former Fast.

Quinquagesima or *shrove Sunday* is 50 days before Easter, it is also called *Esto mihi*, from *Psal.* 30. 3, *Esto mihi in Deum protectorem*, &c. And because there are but 36 days besides Sundays, in the Quadragesimal Fast, which begins the next Sunday, there are four days of this Week added thereto, namely Wednesday, Thursday, Friday and Saturday.

Quadragesima is celebrated six Weeks or 40 days before Easter, called Lent, which the Church Observes: First in remembrance of the 40 days that *Moses* fasted when he received the divine Law. Secondly in imitation of the 40 days *Elijah* fasted. And lastly, and above all, in

comme-

commemoration of the 40 days that our Blessed Saviour fasted before the Tempter came. And because there are but 36 days, besides the Lords days, therefore to supply that defect, there was by the Ancient Christians four days of the precedent week added to this Quadragesimal Fast.

Dies Cinerum, or *Ash-wednesday*, (being the first day of the four added to the former Fast) was so dedicated by *Gregory* the Great, because on that day the Priest used to sprinkle Ashes upon the heads of the People, to put them in mind of their mortality, uttering these words, *Memento homo quod cinis es, & in cinerem reverteris*, &c. This day is the head and beginning of the Quadragesimal Fast, whereon (in places of light) the Ancients used to inscribe these words, *Mors imperat Regibus, odiosam Linguam judicat Dominus.*

The second Sunday in Lent is called *Reminiscere*, from the words of the 25. *Psal.* v. 6.

The third *Oculi* from the 15 and 16 verses of the same *Psalm*, *Oculi mei semper ad Dominum*, &c.

The fourth *Lætare* from the 66. chap of *Isaiah*, v. 10, 11. *Lætare cum Jerusalem*, &c. Others call it *Dominicam de Rosa*, Alluding to the Golden Rose, which the Roman Bishop beareth in his hand before the people in the Temple. It is also called *Dominicum de Panibus*, because that thereon the Miracle of the Five Loaves is explained

The fifth is called *Judica* from the entrance of the 43 *Psal.* v. 1, 2, 3. *Judica me Deus, & discerne causam meam*, &c.

The sixth *Dominica Magna, seu Palmarum*, or the great Lords Day, which hath this name, according to S. *Chrysostom*, *Hom.* 30. *in cap.* 10. *Gen.* because of the great and ineffable good things which befel the faithful in the following Week; Death being abolished, Malediction taken away, and the Tyranny of the Devil loosed by the Death of Christ. It hath also the Name of *Palm-Sunday* from the branches of Palms which the Jewish people strewed on the ground, when our Saviour Christ entred into the City of *Jerusalem*.

The Wednesday next after, is the Councel Day of the Scribes

Scribes and Phariſees, when they moſt wickedly conſp[ired] the Death of our Bleſſed Saviour, *Math.* 26.3. *Tunc congregati ſunt Principes Sacerdotum, & Scribæ, & concilium fecerunt ut Jeſum dolo tenerent & occiderent*, &c.

The next day being Thurſday, is the preparation [to] the Legal Paſſover, in the evening whereof was the [In]ſtitution of the Supper, after which (when they had [ſung] a Hymn) Chriſt went out into the Mount of Oli[ves]. It is alſo called Maundy Thurſday from *Mandate*, in [me]mory of our Saviour Chriſt, who as on this night, [after] his laſt Supper, and before his Inſtitution of the [Sa]crament, *waſhed his diſciples feet*, Joh. 13.5. telling them that they muſt afterwards do the like one to another, and after which he gave them this Mandate, v.34. *Mandatum novum do vobis, ut diligatis invicem, ſicut dilexi vos.*

And laſtly, *Good Friday*, the Day of the Paſſion and Croſs of Chriſt, whereon he ſuffered for the ſins of the whole World, and made ſatisfaction to God the Father for mankind.

Next to this great Week, is celebrated the Feſtivity of the Paſch, or Feaſt of EASTER, in memory of the Reſurrection of our Saviour, which is the Baſis and Foundation of all the Lords days, and Moveable Feaſts in the year.

Immediately after Eaſter follows the Quinquageſima-time or Interval of 50 days, between Eaſter and Pente-coſt, which was kept by the Primitive Chriſtians with exceeding great Joy and gladneſs, as a whole and intire Feſtival in remembrance of the glorious Reſurrection and Aſcenſion of Chriſt, and Miſſion of the Holy Ghoſt. It containeth Six Sundays, whereof the firſt after Eaſter is called, *Quaſimodogenite*, from the 1 *Pet.*2.21. It is alſo called *Dominica in albis*, becauſe that as the Angels appeared at the Reſurrection in white and ſhining Garments, ſo of old ſuch as were baptized on Eaſter day, did wear and walk all the week after in white Garments, which they laid aſide on this day.

The ſecond Sunday after Eaſter is called *Miſericordia*, from *Pſal.*33.5,6. *Miſericordia Domini plena eſt Terra.*

The

The third Sunday is called *Jubilate*, from the entrance of the 65 *Psal.* 1. *Jubilate Deo omnes terra*, &c

The fourth, *Cantate*, from the entrance of *Psal.* 97. 1. *Cantate Domino canticum novum.*

The fifth, *Vocem Jucunditatis*, from the like entrance, *Vocem Jucunditatis annunciate & audietur*, &c. It is also called *Dominica Rogationum*, Rogation Sunday, from whence all the week following, is called Rogation week, wherein it hath been a Custom full as good as Ancient, to make Preambulations and Processions in every Parish, for viewing and rectifying the ancient bounds and Limits of the Fields, to prevent Incroachments and controversies, that may otherwise arise, and more to pray unto Almighty God for the increase of the Fruits of the Earth, which now begin to bud and blossom, and to render him thanks for those his blessings towards us poor mortals.

The next Thursday after Rogation Sunday (which is 40 days after Easter) is celebrated the Feast of the Ascension of our Lord, which is the Consummation of all he did whilst he was upon earth. Finally, the sixth Sunday is called *Exaudi*, from these words of the 27 *Psal.* 2. *Exaudi Domine vocem de precationis meæ, dum oro ad te*, &c.

Next follows the solemnity of *Pentecost*, which as it was of old celebrated by the *Jews* the 50 day after the Passover, in memory of the Divine Law promulgated in Mount *Sinai*: so it is now observed by the Christians the Seventh Sunday after Easter, to commemorate the mission of the Holy Ghost on this day, who is the only and best interpreter of the Divine Law.

The next Sunday after, is the Feast of the Holy Trinity, which was instituted by *Gregory* 4. *Anno* 827. in Honour of the Holy Trinity.

All the Sundays which follow this Sunday of the Holy Trinity are called, according to their Numeral order, as the 1, 2, 3, Sundays after Trinity, *&c.* until the first of Advent.

Lastly the four Sundays which next and immediately precede the Nativity of Christ, are called the Sundays of Advent,

Advent, ſo as the firſt or remoteſt of them is celebra in memory of the entrance of the *Meſſiah* into *Jeruſal*

The Second from his coming to Judge the World the laſt day. The third from his coming to the Miniſt The fourth for a preparation to the coming of Chriſt, tis *Iſaiah* 40. 3. *Parate viam Domini, rectà facite ſeni dei noſtri.* And thus much for the Chriſtian ſolemnities Holy days, which are Moveable.

The fixed Feaſts are thoſe which never change the places in the Kalender, but always retain one and the ſam day of the Month, as the Circumciſion, Epiphany, and other Feaſts of Saints and Martyrs, except the Moveable before commemorated. To conclude, I ſhall only add that they were ordained to a good and pious end by the Primitive Chriſtians, and ought ſtill to be religiouſly ob ſerved in remembrance of the Bleſſed Prophets and A poſtles, whoſe Memories ſhall never periſh.

Pickworth in the County of *Rutland*, *May* 1696.
